

# Thermal Inkjet PATENTED Augmented Reality

Create new  
interactive retail  
experiences

By using creative interactive augmented reality experiences and using HP TIJ 2.5 technology, we can offer you new highly visual & interactive product experiences designed to maximise your products interaction with your customer.

Our thermal inkjet augmented reality is fully customisable & can be targeted specifically for your products.

Utilising a new commercialisation model, cost per click or cost per print, we offer a low cost way to implement augmented reality without expensive digital marketing costs.

- Fully customisable
- Android & IOS APP
- Easy implementation
- Unique commercialisation model
